PROFESSIONAL SUMMARY

Cleared IT Specialist and Navy Veteran with 10+ years of experience in secure network infrastructure, telecommunications, and cryptographic systems administration. Background includes installing and maintaining cryptographic devices, administering classified messaging and network enclaves, managing VoIP and Mitel phone systems, and supporting DIA missions. Experienced with Cisco IOS, Junos OS, CentOS, Red Hat, Windows Server, Splunk, Nessus, and infrastructure provisioning.

CLEARANCE

Active TS/SCI with CI Poly

CERTIFICATIONS

CompTIA Security+

TECHNICAL SKILLS

Networking and Telecommunications: Cisco IOS, Junos OS, LAN, WAN, VoIP, Mitel phone systems, video conferencing, ADNS, DHCP

Cryptographic and Secure Systems: KG-175, TACLANE, KIV-7, KG-84A, KWR-46 cryptographic devices; EKMS key management; SMART.neXt classified messaging administration

Security and Monitoring: System security, policy implementation, Splunk, Nessus, vulnerability scanning, patching

Operating Systems: Unix (Solaris), CentOS 7, CentOS 8, Red Hat, Windows, Windows Server

Provisioning and Support: IaC, CentOS workstation provisioning, technical support, problem resolution, customer service

Programming: Python, HTML

EDUCATION

Oregon State University

B.S. Computer Science (in progress), Expected 2028

PROFESSIONAL EXPERIENCE

IT Specialist II

April 2022 - Current

Rincon Research Corporation, Centennial, CO

- Serve as CSG site lead for Colorado operations across the Centennial and Colorado Springs locations.
- Manage, install, and support network devices, workstations, Mitel phones, VoIP systems, and video conferencing equipment.
- Troubleshoot Windows, CentOS 7, and CentOS 8 systems, including software installation and end-user technical support.
- Use and manage IaC and Ansible workflows to provision new CentOS workstations and support repeatable configuration management.
- Coordinate site-level support for hardware, software, communications, and IT issues while maintaining compliance with organizational policies.
- Write and maintain standard operating procedures and troubleshooting/setup guides for site systems and workstation deployments.

Information Systems Technician

July 2018 - August 2022

United States Navy, Makalapa Joint Base Pearl Harbor Hickam

- Managed and troubleshooted seven network enclaves valued at \$720 million and used by 330,000 personnel across 36 Asia-Pacific nations.
- Supervised a 24/7 network operations center while managing teams of more than 10 personnel; managed daily monitoring and installation of cryptographic devices, such as KG-175s and KIVs.
- Configured and upgraded TACLANE encryptors, created cut sheets for TACLANE installations, and updated KG-175 configurations, including remote management setup.
- Qualified in Electronic Key Management System (EKMS) procedures for cryptographic key handling and accountability.
- Installed network switches and troubleshooted configuration issues; ran fiber cable and installed classified network clients in support of Top Secret and JWICS network builds.
- Supported Defense Intelligence Agency (DIA) missions as a cryptographic and network technician.
- Served as Secure Message and Routing Terminal Next Generation (SMART.neXt) messaging systems administrator; maintained 41 lines for the daily dissemination of 800,000 classified pieces of information with no discrepancies.

Information Systems Technician

July 2015 - July 2018

United States Navy, Norfolk, VA

- Loaded and maintained cryptographic devices, such as KIV-7, KG-84A, and KWR-46, in a timely manner.
- Maintained and restored data circuits spanning the high-frequency (HF) spectrum that provided internet services and shipboard communication.
- Oversaw four network enclaves, servers, and all end-user devices onboard; performed vulnerability scans and applied patches to identify and protect against potential threats.
- Led 18 sailors as help desk supervisor in support of more than 3,000 personnel for the Navy's first virtualized tactical afloat network.
- Managed a comprehensive inventory of 650 zero clients and 47 printers across eight locations in the Norfolk, VA, area; maintained 100 percent accountability of more than \$40,000 in network equipment with no losses.
- Provided daily network status briefings to management and proposed cost-efficient solutions to network vulnerabilities.
- Decreased network downtime by 10 percent using diagnostic measures to troubleshoot and identify holes in the system.
- Reduced the number of technical incidents by 25 percent through meticulous cable management, precautionary security measures, and scheduled preventive maintenance.

SPECIALIZED MILITARY TRAINING

WAN Administration Training | Cisco IOS Upgrades | Service Central Ticket Software | U.S. Navy ADNS System Administration Training | SMART.neXt Admin Training

AWARDS AND RECOGNITION

- Company Recognition, Rincon Research, 2023
- Joint Service Commendation Medal, United States Navy, 2022
- Junior Sailor of the Quarter, Defense Intelligence Agency, 2021
- Navy and Marine Corps Achievement Medal, 2018

VOLUNTEER EXPERIENCE

Habitat for Humanity International: May 2021 - January 2022

Hawaii Foodbank: April 2020 - January 2022

Virginia Peninsula Foodbank: April 2019 - June 2019

Polar Plunge Special Olympics Event, Virginia Beach February 2017
