PROFESSIONAL SUMMARY

Cleared IT Specialist and Navy Veteran with 10+ years of experience in network infrastructure, telecommunications, server administration, endpoint support, and IT security operations. Experienced supporting Windows, Windows Server, CentOS, Red Hat, Cisco IOS, Junos OS, Splunk, Nessus, SharePoint, and infrastructure provisioning. Background includes classified messaging systems, network operations, cryptographic devices, vulnerability scanning, patching, technical troubleshooting, and site-level IT support.

CLEARANCE

Active TS/SCI with CI Poly

CERTIFICATIONS

CompTIA Security+

TECHNICAL SKILLS

Operating Systems: Unix (Solaris), CentOS 7, CentOS 8, Red Hat, Windows, Windows Server

Networking: Cisco IOS, Junos OS, LAN, WAN, VoIP, Mitel phone systems, video conferencing

Security and Monitoring: System security, policy implementation, Splunk, Nessus, vulnerability scanning, patching

Provisioning and Support: IAC, CentOS workstation provisioning, technical support, problem resolution, customer service

Applications and Tools: Microsoft Office products, Microsoft Visio, SharePoint, Matplotlib

Programming: Python, HTML

EDUCATION

Oregon State University

Computer Science Coursework, Expected 2028

PROFESSIONAL EXPERIENCE

IT Specialist II

Rincon Research Corporation, Centennial, CO | April 2022 - Current

- Serve as CSG site lead for Colorado operations across the Centennial and Colorado Springs locations.
- Manage, install, and support network devices, workstations, Mitel phones, VoIP systems, and video conferencing equipment.
- Troubleshoot Windows, CentOS 7, and CentOS 8 systems, including software installation and end-user technical support.
- Use and manage IAC workflows to provision new CentOS workstations and support repeatable workstation deployments.
- Coordinate site-level support for hardware, software, communications, and IT issues while maintaining compliance with organizational policies.

Information Systems Technician

United States Navy, Makalapa Joint Base Pearl Harbor Hickam | July 2018 - August 2022

- Served as Secure Message and Routing Terminal Next Generation (SMART.neXt) messaging systems administrator; maintained 41 lines for the daily dissemination of 800,000 classified pieces of information with no discrepancies.
- Supervised a 24/7 network operations center while managing teams of more than ten personnel; managed daily monitoring and installation of cryptographic devices, such as KG-175s and KIVs.
- Managed and troubleshot seven network enclaves valued at \$720 million and used by 330,000 personnel across 36 Asia-Pacific nations.
- Designed and implemented solutions for the organization that drastically cut project times.
- Supported Defense Intelligence Agency (DIA) missions as a cryptographic and network technician.

Information Systems Technician

United States Navy, Various | July 2015 - July 2018

- Led 18 sailors as help desk supervisor in support of more than 3,000 personnel for the Navy's first virtualized tactical afloat network.
- Managed a comprehensive inventory of 650 zero clients and 47 printers across 8 locations in the Norfolk, VA, area; maintained 100 percent accountability of more than \$40,000 in network equipment with no losses.
- Oversaw four network enclaves, servers, and all end-user devices onboard; performed vulnerability scans and applied patches to identify and protect against potential threats.
- Maintained and restored data circuits spanning the high-frequency (HF) spectrum that provided internet services and shipboard communication.
- Decreased network downtime by ten percent using diagnostic measures to troubleshoot and identify holes in the system.
- Loaded and maintained cryptographic devices, such as KIV-7, KG-84A, and KWR-46, in a timely manner.
- Provided daily network status briefings to management and proposed cost-efficient solutions to network vulnerabilities.
- Reduced the number of technical incidents by 25 percent through meticulous cable management, precautionary security measures, and scheduled preventive maintenance.

SPECIALIZED MILITARY TRAINING

WAN Administration Training | Cisco IOS Upgrades | Service Central Ticket Software | U.S. Navy ADNS System Administration Training | CPR | Shipboard Fire Fighting | SMART.neXt Admin Training

AWARDS AND RECOGNITION

- Company Recognition, Rincon Research, 2023
- Joint Service Commendation Medal, United States Navy, 2022
- Junior Sailor of the Quarter, Defense Intelligence Agency, 2021
- Navy and Marine Corps Achievement Medal, 2018

VOLUNTEER EXPERIENCE

Habitat for Humanity International: May 2021 - Jan 2022

Hawaii Foodbank: Apr 2020 - Jan 2022
